

Climate-related Disclosures Readiness Workshop Series

Building the capability of you and your organisation

Delivered by SBC in partnership with Deloitte, KPMG and Toitū Envirocare

Deloitte.

KPMG

TOITŪ
ENVIRO CARE

Climate-related Disclosures (CRDs) are far more than a compliance exercise

While they are designed to provide transparency over an organisation's exposure to climate risk to investors, shareholders and stakeholders, the CRD process also enables organisations to identify and harness climate-related opportunities, develop a strategy for managing the risks and uncertainty presented by future climate states, and enhance their operational resilience to climate change impacts.

The Sustainable Business Council (SBC) has partnered with KPMG, Deloitte & Toitū Envirocare to develop a Climate-related Disclosures Readiness Workshop Series, designed to provide valuable insights into the practical application of the core elements of CRD. This series will be open initially to SBC members and CLC signatories, with a maximum capacity of 30 participants. Broader invites may be extended, capacity depending.

Spaces are limited. Register by emailing ckootstra@businessnz.org.nz

SBC/CLC members: exclusive registration until 21st September

Non-SBC/CLC members: register your interest now, spaces will be allocated after 21st September

What to expect from this workshop series

- You and your organisation will be empowered to build and develop your climate disclosure journey.
- You'll be provided with support to understand and apply the core elements of CRD.
- You'll build your capability on the 'how' components of CRD, including establishing effective management governance structures through to setting effective targets that improve an organisation's resilience to climate change.
- The conversation will move from 'tick the box compliance' to one of enablement and action.
- You'll establish connections and build networks with others who are also on their CRD's journey.

Who should attend the workshop series?

- CFOs and/or CROs who need to be across the detail of their organisation's climate-related disclosures.
- Delivery teams who will be presenting on CRD to committees and board for sign-off.

Speakers

Amy Sparks, Deloitte
Associate Director - Corporate Finance

Sanel Tomlinson, KPMG
Principal - IMPACT Measurement & Reporting

Belinda Mathers, Toitū Envirocare
Chief Science & Advisory Officer
